WORK EXPERIENCE

Help Desk Engineer L1

CompuNET, Burlington, WI

January 2026 - Present

- Provide onsite and remote end-user technical support across multiple K-12 environments, serving as the primary MSP support contact at two schools, including a high-needs school and a school with its own independent IT team.
- Troubleshoot and deploy computers, Chromebooks, printers, peripherals, displays, software, user accounts, and classroom technology.
- Support summer technology initiatives across four schools, independently handling student-device preparation at one school and collaborating with MSP staff on device deployment at others.
- Coordinate with network and systems engineers to troubleshoot connectivity, device management, certificates, accounts, and other issues requiring elevated access.
- Respond to written and verbal support requests from faculty, staff, and administrators, documenting issues and communicating technical solutions to users with varying levels of technical experience.
- Developed a Google Admin/Google Sheets inventory workflow for 700+ Chromebooks, improving device tracking and reducing manual inventory work.
- Implemented an OBS-based board meeting recording solution and provided technical guidance and troubleshooting to faculty, staff, and administrators.

Teaching Assistant - Computer Science 241

University of Wisconsin-Parkside, Somers, WI

Spring 2025

- Provided technical instruction and one-on-one debugging assistance for students learning Java, adapting explanations to varying levels of technical experience and reinforcing structured problem-solving and clean coding practices.

Busser / Host

Bristol 45 Diner, Bristol, WI

August 2017 - January 2026

- Delivered customer service in a fast-paced team environment while training and onboarding new employees.

EDUCATION

Bachelor of Science in Computer Science

May 2025

University of Wisconsin-Parkside, Kenosha WI

Certificates: Web Development, Data Science

SKILLS

IT & Support: End-User Technical Support, Hardware Troubleshooting, Windows, ChromeOS/Chromebooks, Google Workspace, Printer & Peripheral Support, Device Deployment, Software Installation & Configuration, User Account Support

Systems & Networking: Network Troubleshooting, Google Admin, Device Management, Inventory Management, Basic Network/Systems Support.

Data & Tools: Google Sheets, Excel, Python, SQL, Git/GitHub

Professional: Technical Documentation, Knowledge Base Development, Process Improvement, Stakeholder Communication, Customer Service

NOTABLE PROJECTS

Chromebook Inventory & Reporting System

Google Sheets, Google Admin

Identified organizational inconsistencies affecting the management of over 700 Chromebooks and designed a streamlined reporting workflow using Google Admin exports and Google Sheets. The centralized process improved inventory visibility, simplified device tracking for school staff, and reduced the manual effort required to maintain accurate records.

Personal Portfolio Website

HTML, CSS, JavaScript

Designed, developed, and deployed a responsive personal portfolio website to showcase technical projects, skills, and professional experience. Focused on clean UI/UX, responsive design, accessibility, and maintainable front-end code.

CERTIFICATIONS

Google Data Analytics Certification

Coursera 2025

Database and SQL for Data Science with Python

Coursera 2025
